MUHAMMAD JUNAID

Personal Portfolio Report

Computer Science | COMSATS University Islamabad

October 2026

Live: https://port-inky-ten.vercel.app

GitHub: https://github.com/junaid-devv/portfolio

Project Overview

This report presents the personal portfolio website developed for Muhammad Junaid, a Computer Science student at COMSATS University Islamabad. The portfolio is a fully responsive, modern, dark-themed website built entirely with HTML5 and CSS3 -- no JavaScript. It highlights his technical skills, featured projects, academic background, and professional identity.

The website has been deployed to Vercel and the source code is hosted on GitHub, both publicly accessible via the URLs on the title page.

Website Preview

Hero Section

The landing section introduces Muhammad Junaid with a gradient name heading, professional role titles, call-to-action buttons, key statistics, and an animated avatar with floating technology badges.

Figure 1 -- Hero / Landing Section

Skills & Technologies

Technical skills organized into three categories with visual progress bars showing proficiency levels across web development, app development, and general tools.

Figure 2 -- Skills & Technologies Section

About & Education

The about section presents a personal narrative through three info cards. The education timeline highlights the BS Computer Science degree and key coursework at COMSATS University.

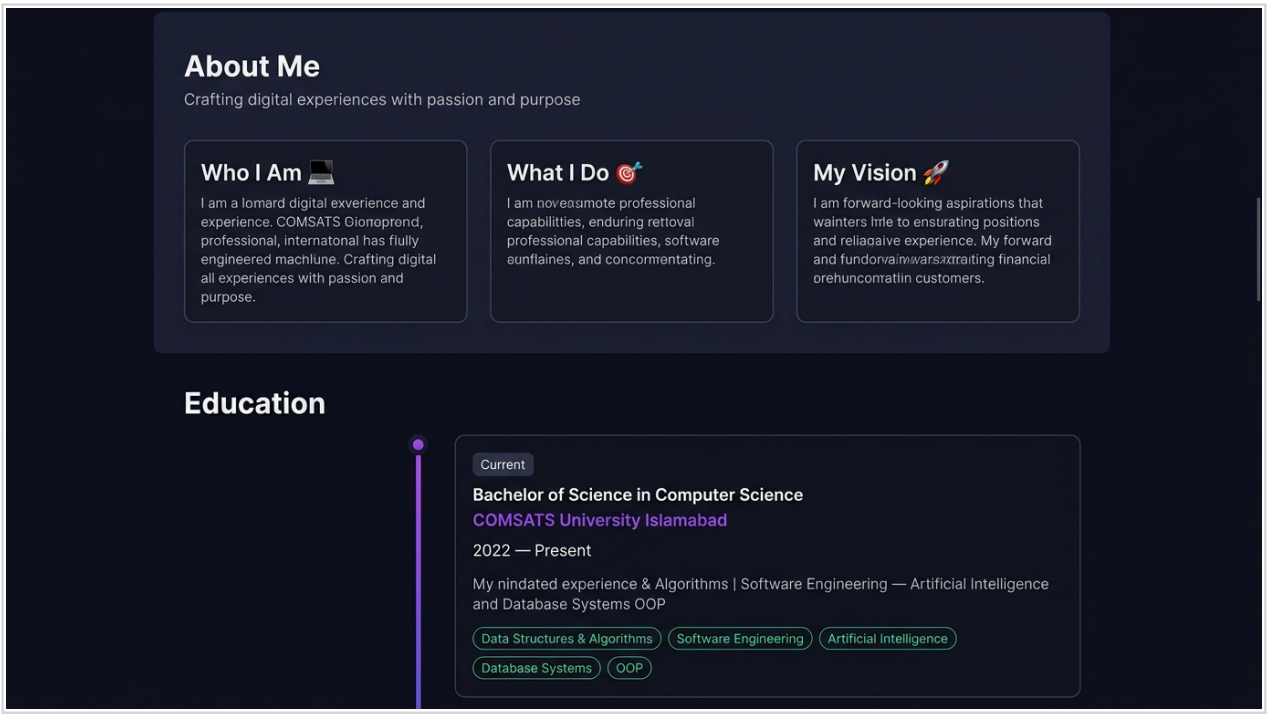

Figure 3 -- About Me & Education Section

Technical Skills

Web Development

Skill	Proficiency
HTML5	90%
CSS3 / Tailwind CSS	85%
JavaScript	80%
React.js	75%
Node.js / Express	72%

App Development

Skill	Proficiency
Flutter / Dart	80%
React Native	70%
Firebase	78%
REST APIs	82%
UI/UX Design	73%

Tools & Languages

Skill	Proficiency
Git / GitHub	85%
Python	78%
C / C++	75%
AI / ML Fundamentals	65%
Databases (SQL / NoSQL)	76%

Featured Projects

1. Campus Mate App

A comprehensive campus companion mobile application designed for university students. Key features include class schedule management, campus navigation, event tracking, GPA calculator, resource sharing among peers, and real-time notifications for important academic announcements.

Status	Completed
Tech Stack	Flutter, Dart, Firebase, REST API, Cloud Functions

2. WhatsApp AI Agent for Restaurants

An intelligent WhatsApp-based conversational AI agent built for the restaurant industry. Customers can browse menus, place orders, make reservations, and receive instant responses -- all through WhatsApp. The agent uses natural language processing to understand queries and automates order management end-to-end.

Status	Completed
Tech Stack	Python, WhatsApp API, NLP, Node.js, MongoDB

3. 2D Mobile Game

An engaging 2D mobile game currently in development, featuring immersive gameplay mechanics, pixel-art inspired visuals, character progression systems, dynamic environments, leaderboards, and smooth touch-based controls optimized for mobile devices.

Status	In Development
Tech Stack	Unity, C#, 2D Physics, Sprite Animation

Education

Degree	BS Computer Science
University	COMSATS University Islamabad
Duration	2022 - Present

Relevant coursework: Data Structures & Algorithms, Software Engineering, Artificial Intelligence, Database Systems, and Object-Oriented Programming.

Interests

- Competitive programming and algorithmic problem solving
- UI/UX design and creating intuitive user interfaces
- Open-source contribution and community collaboration
- Game development and interactive media
- AI-powered automation and intelligent systems
